STOCK LIST

BEARS AGGRESSIVE, AND BROUGHT ABOUT NUMEROUS DECLINES.

Sudden Rise in Sterling Exchange at the Close-Local Markets Glutted and Prices Weak.

At New York, yesterday, money on call (The quotations given below are the selling was easy at 11/22 per cent.; last loan 2;

closed at 2. Prime mercantile paper, 4251/2 per cent. Sterling exchange was firm, with actual business in bankers' bills at \$4.851/4@4.881/2 for demand and \$4.87%@4.87% for sixty days; posted rates, \$4.88@4.89; commercial bills, \$4.86%; silver certificates, 68% @69c. At Lon-

don bar silver closed at 31%d per ounce. Total sales of stocks were 235,003 shares, including: American Tobacco, 17,500; Atchison, 3,100; American Sugar, 51,500; Burlington & Quincy, 17,400; Chicago Gas, 7,200; General Electric, 4,200; Louisville & Nashville, 8,400; Manhattan, 4,400; Reading, 3,700; Northwest, 3,000; Rock Island, 8,700; St. Paul, 27,100; Tennessee Coal and Iron, 30,-700; Wheeling & Lake Erie, 3,600; New Jersey Central, 3,500; silver certificates, 10,000.

activity yesterday, and the tone was decidedly weak throughout, material declines being scored in many instances. The unfavorable influences included apathy gold, expectations of impending large shipments of the precious metal based on decases, and the course of prices ruled steadily lower as the day progressed under selling for both accounts. In addition to the depressing factors noted, sharp declines in both issues of government 4-per-cent. bonds served to unsettle values. The bears dis-played aggressiveness all day and were nelped in their efforts by liquidating and the uncovering of stop loss orders in numerous instances. Their especial attacks were directed against the industrials, coalers and stocks of the corn-carrying roads, and were effective almost without exception. The more important losses in the first hour extended to 11/2 per cent. in Burilington and 1% per cent. in New Jersey Central in the railway list and in the industriais to near full figures in Sugar and General Electric. There was no special news bear-ing unfavorably on either of the last named stocks. Shortly before noon the market became quieter, and moderate rallies occurred generally with the exception of Leather preferred, which sold off to 54 on liquidation alleged to be due to the dullness of the leather industry, and Cotton Of preferred, which broke 3/2 per cent, on the sale of only 200 shares. The specumtion continued fairly animated in spots, and prices advanced and then reacted slight tractions. Leather preferred, however, displayed further weakness. After 1 o'clock the specialty mentioned made further decided downward progress and touched 50, an extreme break of 5 per cent. from the opening figure. Sugar sympathized with the slump in Leather by a drop of 1% per cent., to 106%. The lowest prices of the day were reached in the last hour, the extreme

decline ranging between 2 and 44 per cent. in the more prominent active list. A drop of % and ½ per cent., respectively, 7c; Swift River, 5%c. in the new and old government fours contributed to the prevailing unsettled specu-lative temper. At the low points in the internationals some foreign buying orders were executed, and some commission house purchases of the railway stocks generally was noted on a small scale. An important \$5.38; Crushed. \$5.60; XXXX Powdered, \$5.35; unfavorable influence in the late dealings was an advance in actual rates of sterling exchange for sixty-day bills to \$4.87\\@4.87\\.

active issues the most important losses ex-

Government bonds were dull and weak for both issues of fours. The new fours sold off %, to 114%, and the old fours 1/2 per cent., to 10714. The other issues were steady. The

sales were \$20,000. Silver certificates were dull but a shade higher on dealings of \$10,000 at 68%.

Surgery Relieves Pressure on Brains Cramped by the Skull.

Philadelphia Inquirer. The wonderful results that in these upto-date times follow the application of the higher, at 3.65c. expert surgeon's knife almost challenge the belief of ordinary mortals. Yet, those interested in the science declare that they are but upon the threshold of a course that will lead to something more astonishing than any of the achievements yet obtained. This especially applies to the difficult science of brain surgery, in which particular and most important branch more rapid strides have been made during the past few years than in any other line. As this city has long held, and deserved the honor, of being the surgical center of America it is only natural that the advancement in this class of operations has been more marked here than in any other city. From the results already obtained and the future promises that seem almost sure to be fulfilled, successful operations of the most startling nature are confidently expected to soon become matters of course. Naturally brain surgery, as it is called, is applied almost entirely to relieve idlocy. The best effects are obtained with the young and in the cases where the mental trouble arises from the failure of the skull to develop in size to accommodate the brain a cure, or, at least, marked improvement is now looked upon as the certain result of the difficult and delicate operation. Some few years ago the march forward in this branch of surgery began. Surgeons conceived the idea of relieving pressure on the brain by removing small circular bits of the skull over the parts diagnosed to be diseased. The pieces removed varied in size from those as large as a pea to bits as large exchange for sixty-day bills to \$4.87\(\frac{1}{2}\)(4.87\(\frac{1}{4}\).

The closing was weak at not far from the lowest of the day.

Railroad bonds were dull, but declined fractionally in most cases in sympathy with the lower trend of stock prices. In the lower trend of stock prices. Mold A, \$4.85; Diamond A, \$4.86; a quarter dollar in circumference. Some good was obtained, but in the great number of cases treated scarcely a sufficient percentage to warrant the belief that the right method had been found. The work was continued along the same line, how-C-Centennial B, \$4.29; 9 Yellow Ex. C-Califor- ever, the next step being the removal of a tended to 1½ per cent. in Northern Pacific | nia B, 34.25; 10 Tellow | Land Consol fives and Texas Pacific seconds. The | Il Yellow-Keystone Ex. C, \$4.17; 12 Yellow-back of the head or running from the fore-head to the crown. More success attended this, but still the failures to secure the desired improvement in a majority of the cases was apparent. It remained for Philadelphia physicians to discover a method which has thus far proved to be not only vastly ahead of anything heretofore done, but to justify the claim by many of the best authorities that the proper method had at last been found. The latest form of operation is decidedly more intricate than any of the others, but is not more that of hundreds of cases operated upon July, 80%@61%c, closing at 61%c; September, 61% not a single fatality has followed. The work, which really consists of three

> opened. The same narrow strip is removed from the frontal bone back to the Third and best the joint across the back of the head is opened and again the strip is taken out. This completes the task and the skull is then open in all directions and ready to allow the brain matter to grow

and develop. The wounds soon heal and the spaces between the bones become covered with a fleshy covering of great strength and elasticity. The operation on each occasion occupies scarcely half an hour, and the good re-

sults usually become apparent in a very A particular case is cited, in which the patient, a small boy, was utterly devoid of understanding. His brain was utterly incapable of retaining any impression, and he was absolutely unable to determine right from wrong. He was operated upon some time ago, and a gradual improvement soon became noticeable. He grew better rapidly, and in a few months after the wound healed was attending a public school, and was rated one of the brightest

pupils in his class. His case is but a sample of many others, and astonishing results are coming to the notice of surgeons every day, as they carefully watch the patients who have been operated on. While the general public places the brain on almost equal terms with the heart in the danger of disturbing it the surgeons have no such thought, and boldly proceed with their work and justify their methods by the splendid results obtained.

She Smokes Cigarettes.

Atlantic City Letter. Talk about the new woman! Well, while she hasn't exactly taken hold of the City Price per box of 50 square feet. Discount, 9 by the Sea, she's sent down a pretty numerous advance guard in the shape of any quantity of pretty girls who do things which last year would have shocked everybody, with an abandon that charms while it startles. According to the head waiter in a well-known restaurant and cafe which cigarette-smoking has come to be an almost general practice with the gentler sex. He says that every night in the week there are at least half a dozen parties in the place, the feminine members of which wind up their luncheon or their supper with a cigarette or two. The practice is by no means confined to those who value "a good time" higher than appearances, but it is indulged in to a considerable extent by the fashionable fair, and that not in the seclusion of their boudoir, but right along with sweetheart or brother. A party of six, led by a well-known Philadelphia club man, enjoyed a little supper up at the Inlet a few evenings ago and at its conclusion all indulged in a cigarette. Three of the party were stylish, handsome girls, and, what is most notable of all, one of them

Fifty-Per-Cent. Honesty.

average, 4%c; 35 to 45 lbs average, 5%c: 20 to 30 lbs average, 5%c. Clear bellies, 27 to 35 lbs average, 4%c; 18 to 22 lbs average, 4%c; 14 to 16 lbs average, 5%c. Clear backs, 12 to 16 lbs average, 5%c. CEIPT OF BAD CROP REPORTS.

All Grain Markets Closed Higher, shipments, 1,000 bu. Corn easy; No. 2 mixed, Mrc. While Provisions Managed to Score Slight Gains.

CHICAGO, July 14.-Persistent crop-damage reports and the prevailing hot weather helped wheat to-day. The strength shown by the coarser grains was also of material assistance, and September closed with 1c advance. Corn closed %c higher and oats 1c higher, both grains being affected by bad crop reports. Provisions showed some strength and closed slightly higher.

A decided improvement in the volume of

wheat trade was noted to-day. The opening was rather easy and at slight recessions, due to the heavy local and Northwestern receipts and the weak New York stock market. But there was little for sale, and the market quickly hardened. The advices from the Northwest all tended to show increasing seriousness of crop 1,000 damage, the short interest began to cover, and there was good investment buying, under which the movement was pretty steadily upward. Bradstreet's statement of the world's visible showed a net decrease of 2.011,000 bu in the world's stocks, compared with a decrease of 3,171,000 bu in the Transfers, 6; consideration...... \$3,575 corresponding week of the year before. That threw a damper on the bullish sentiment and caused the price of September to sag gradually back. There were plenty of buying orders at the decline, and it did not take long to clear up all the offerings. This sent the market cumbing in quick order again, and the close was at top prices. This late advance was helped materially by the strong corn and oats markets. Sep-Carrie Jones, eight years, 412 West Third street, tember opened 1/3c lower, at 55%@56%c, advanced steadily to 56%c, declined to 56%c, advanced and closed steady at 56%c. Corn showed decided strength, being influenced by the bad crop reports, the moderate local receipts and the expected reduction of lake and rail rates to-day. Shorts were active buyers most of the day, and the volume of business was much better than of late. There was some decline with the midday easiness of wheat, but Elanore and Israel Lloyd, 24 Cusham street, small estimated receipts for to-morrow 3%d. Queensland-2,350 bales; scoured, 10%d@ strengthened prices again. September 1 is 4d; greasy, 64/9 opened unchanged at 274c, sold up to 281/2c, off to 27%c, and advanced to 28%c, where it

> Oats were active, but largely on local account, and decidedly higher. Crop advices | 1s 1d; greasy, 51/2071/2d. are unfavorable and the market was also helped by the advance in corn and wheat. September opened a shade easier at 15% (g 15%c, and sold up with slight fluctuations to 17c, closing firm at 16%c.

Provisions had only a moderate trade. Prices were somewhat stronger at the opening with the firm hog market, offerings were liberal and a heavy feeling was soon induced. The final rally in grain started prices up again, and the closing was steady at nearly the high point. September pork closed 7½c higher, at \$6.65; September lard .02½c higher, at 3.72½c; September ribs .05c
